SUMMARY

Experienced Frontend Developer with 2 years specializing in React JS & JavaScript. Delivered 10+ responsive interfaces meeting performance benchmarks. Led client interactions ensuring 100% alignment with requirements, achieving high satisfaction scores. Seeking new opportunities to craft impactful digital experiences. Dedicated to continuous learning and organizational growth.

WORK EXPERIENCE

Deloitte USI

Aug 2022 - Present

Frontend Developer | Bengaluru, India

- Developed standalone UI components: Created standalone as well as integrated UI components following best practices, responsive design, and reusable design patterns. Integrated components into larger frontend architecture ensuring seamless functionality within the application.
- Integrated frontend with backend APIs: Successfully integrated APIs for data exchange between frontend and backend systems.
- Conducted SEO Proof of Concepts (POCs): Demonstrated the impact of frontend code changes on search engine visibility, resulting in a 10% increase in search rankings or site visibility.
- Provided deployment assistance: Assisted in monthly and quarterly successful deployments, ensuring smooth transition from development to production environments.
- Conducted KT sessions: Delivered training sessions to junior and senior team members on cross-functional frontend topics, fostering knowledge sharing and team collaboration. Provided insights into advanced frontend techniques, resulting in improved team competency and productivity.
- Critical defect resolution: Successfully resolved more than 200 high to medium level defects through efficient troubleshooting and debugging techniques, ensuring uninterrupted application functionality maintaining product stability and user satisfaction within specified timeframes.
- Direct client engagement: Interacted directly with clients to gather requirements and clarify project objectives for various stories, ensuring alignment with client expectations.

PROJECTS

E-commerce Dashboard

- Product Management: Implemented Create, Read, Update, and Delete (CRUD) operations for efficient product management.
- User Authentication: Developed a secure authentication system to validate user identities before accessing dashboard features.
- Session Management: Implemented session management techniques to maintain user states across multiple interactions.

- Technologies Utilized: Leveraged HTML, CSS, JavaScript, React JS , MongoDB and Node/Express JS to orchestrate these functionalities seamlessly.

Personal Portfolio Website

- Tools & technologies used: React Hooks, Redux, etc.
- Employed responsive design principles to ensure seamless adaptation to various screen sizes and resolutions.
- Leveraged the power of JavaScript to add interactivity and dynamic behavior to the web application.
- Implemented client-side scripting for features like form validation, DOM manipulation, and asynchronous data retrieval

EDUCATION

Bachelor of Technology (B. Tech.)

August 2018 - May 2022

National Institute of Technology, Jalandhar (India)

CGPA – 8.57

SKILLS
